1. Introduction

- This release document provides details about release of the Hanwha Vision BI Dashboard Web Application.
- It includes AI camera data integration, people/vehicle counting, utilization reporting, and dashboard visualization etc.

2. Release Summary

Release Version	V3.0.0
Release Date	01-Sep-2025
Environment	UAT (Pre-Production)
Release Owner	Parth Jotangiya

2.1. New Features:

- Implemented **Live Video Streaming** functionality on the *Floor Plans & Zones* page. Users can now view live camera previews directly from this page.
- Added support for **voice commands** to open and close any dashboard or widget within a specific dashboard.

2.2. Enhancements:

- Improved usability when adjusting zones, cameras, and their locations on the floor plan image.
- Enabled moving the floor plan image using the mouse scroll.
- Introduced **Lazy Loading** to retrieve data in parallel, improving overall page load performance.
- Added a restriction allowing configuration of a maximum of **10 widgets per dashboard**.
- Removed unnecessary API calls from the frontend code to improve application performance during data retrieval and page loading.

2.3. Bug Fixes:

- Corrected incorrect counts displayed for *Least* and *Most* in the Gender widget.
- Fixed an issue preventing device addition, which previously returned an “**HTTP 500 Internal Server Error**”.
- Resolved several design issues in PDF export reports.
- Fixed an issue preventing configured zones from being moved within the floor plan image.
- Resolved camera rotation issues on the Floor Plan image.
- Fixed multiple issues related to the Floor Plan widget.
- Corrected a **color theme issue** on the login page when the dark theme was selected.
- Fixed a loader display issue that appeared during auto-refresh of widgets every 1 minute.
- Resolved an issue preventing CSV report export.

2.4. Deployment Instructions:

- Please refer to the “**Installation Guidelines for Vision Insight BI Dashboard Web App**” document shared earlier.
