2.4.	<i>Deployment Instructions:</i>	5

1. Introduction

- This release document provides details about the release of the Hanwha Vision BI Dashboard Web Application.
- It includes AI camera data integration, people/vehicle counting, utilization reporting, and dashboard visualization etc.

2. Release Summary

Release Version	V3.0.1
Release Date	04-Sep-2025
Environment	UAT (Pre-Production)
Release Owner	Parth Jotangiya

2.1. New Features:

- N/A

2.2. Enhancements:

- When a user **deletes** the **active dashboard**, they will be redirected to the **Welcome page**.
- After setting up the **floor plan widget**, if floors are available in the floor dropdown, the first floor will be selected by default, and data will be loaded as per the configuration. Also, design corrections have been applied to the floor plan widget.
- While adding a new device, the user will receive a proper error message if the **camera API does not respond or the device is out of reach**.
- Added a new endpoint to clear server-side **cached data**.
 - <http://localhost:8090/api/cache/clearcache>

2.3. Bug Fixes:

- Unable to add a new widget when the application is installed on a fresh machine.
- User is able to create a new floor plan, but it is not visible afterward.
- Zone comparison report shows multiple zones that were not configured in the report setup.
- CSV report is not generated according to the user-selected filters.
- Trial license has expired, but the application is still accessible.

2.4. Deployment Instructions:

- Please refer to the “**Installation Guidelines for Vision Insight BI Dashboard Web App**” document shared earlier.
