1. Introduction

- This release document provides details about the release of the Hanwha Vision BI Dashboard Web Application.
- It includes AI camera data integration, people/vehicle counting, utilization reporting, and dashboard visualization etc.

2. Release Summary

Release Version	V3.0.3
Release Date	17-Sep-2025
Environment	UAT (Pre-Production)
Release Owner	Jayendra Makwana

2.1. New Features:

- Added a new page to view all exceptions logged in the system. Below is the URL to access the page.
 - ❖ URL: <http://localhost:8090/Exception-Log>
- Provided an option for users to set the time format (12-hour or 24-hour). This setting will only affect the clock displayed in the top bar.
- Added a *Comparison Mode* option on the *My Report* setup page, allowing users to select People, Vehicles, or both to generate a report.

2.2. Enhancements:

- Enabled support for uploading and restoring large backup files.
- Added a Select All option to quickly select all cameras in the Floor Plan widget setup screen.
- Implemented drag and zoom functionality in the Floor Plan widget for better navigation over the floor plan.
- Fixed the issue of unnecessary API calls to improve performance.

2.3. Bug Fixes:

- Fixed New vs Total visitor line chart issue.
- Name changed widget name to *Modal Type* to *Model Type*.
 - Changes done in the widget title, widget setup, widget permission, and Speech recognition.
- Fixed issue in license expired date validation, the license will be valid on the last day till 12 Noon.
- Fixed the permission issue of floors and zone in the Event logs page.

2.4. Deployment Instructions:

- Please refer to the “**Installation Guidelines for Vision Insight BI Dashboard Web App**” document shared earlier.
