1. Introduction

- This release document provides details about the release of the Hanwha Vision BI Dashboard Web Application.
- It includes AI camera data integration, people/vehicle counting, utilization reporting, and dashboard visualization etc.

2. Release Summary

Release Version	V3.0.5
Release Date	06-Oct-2025
Environment	UAT (Pre-Production)
Release Owner	Jayendra Makwana

2.1. New Features:

- N/A.

2.2. Enhancements:

- Update save dashboard icon.
- Added comma separators for better readability in large numbers. The correction is applied to below widgets:
 - Capacity Utilization for People
 - Capacity Utilization for Vehicle
 - Zone Wise Capacity Utilization for Vehicle
 - Zone Wise Capacity Utilization for People

2.3. Bug Fixes:

- The *Zone Performance Report summary* was not displayed correctly after the selection of *Comparison Mode* change.
- The auto-refresh feature was fetching data for all zones instead of only the selected zone.
- The application stopped recording data after a long idle period. The installer will now create a Task Scheduler to keep the application active during idle time.
- Correction in utilization logic to display the current utilization accurately in charts. The correction is applied to below widgets:
 - Capacity Utilization for People
 - Capacity Utilization for Vehicle
 - Zone Wise Capacity Utilization for Vehicle
 - Zone Wise Capacity Utilization for People
- Fixed the issue where the start and end dates were not synchronized after switching dashboards.

2.4. Deployment Instructions:

- Please refer to the **“Installation Guidelines for Vision Insight BI Dashboard Web App”** document shared earlier.
